

Session Start Scenarios

Scenario 1: Perfect Progress (Day Completed)

Your Message:

Hi! Continuing DeFi agent project.
Starting Week 1, Day 3 - React project creation planned.

Your CURRENT_STATUS.md:

```
markdown

# Current Status

**Phase**: Week 1, Day 2 
**Last Completed**: Git workflow established, all files committed to GitHub
**Next Task**: React project creation and local development (45 min)
**Issues**: None
**Ready**: Yes
```

My Response:

Perfect! Day 2 complete. Let's create your React project structure.
Time allocated: 45 minutes
Ready to start with create-react-app?

Scenario 2: Partial Progress (Need to Continue)

Your Message:

Hi! Continuing DeFi agent project.
Need to finish Week 1, Day 2 - Git setup partially complete.

Your CURRENT_STATUS.md:

```
markdown
```

Current Status

****Phase****: Week 1, Day 2 ⏳ (In Progress)

****Last Completed****: Git CLI installed, local repository initialized

****Still Need****: GitHub connection, first commits

****Issues****: Got confused with remote repository setup

****Ready****: Yes, need guidance on GitHub connection

My Response:

No problem! Let's finish the Git setup.

I'll walk you through connecting to GitHub step-by-step.

Estimated time to complete: 15 minutes remaining

Scenario 3: Encountered Problems (Blocked)

Your Message:

Hi! Continuing DeFi agent project.

Week 1, Day 2 - Git setup blocked, need help.

Your CURRENT_STATUS.md:

markdown

Current Status

****Phase****: Week 1, Day 2 ❌ (Blocked)

****Last Completed****: Git CLI installed

****Blocked On****: GitHub authentication keeps failing

****Issues****: "Permission denied" error when pushing

****Ready****: Yes, need troubleshooting help

My Response:

Let's troubleshoot the GitHub authentication issue.

This is common - I'll help you set up SSH keys properly.

We'll get this resolved quickly.

Scenario 4: Skipped a Day (Getting Back On Track)

Your Message:

Hi! Continuing DeFi agent project.
Haven't worked on it for 2 days, where should I pick up?

Your CURRENT_STATUS.md:

```
markdown

# Current Status

**Phase**: Week 1, Day 2 
**Last Completed**: Git workflow established (3 days ago)
**Next Task**: React project creation (was planned for Day 3)
**Issues**: None, just lost momentum
**Ready**: Yes, need to get back into flow
```

My Response:

Welcome back! No worries about the gap.
You completed Git setup, so we're ready for React.
Let's pick up with Day 3 - React project creation.
Want to continue with the original plan or need a quick refresher?

Scenario 5: Ahead of Schedule (Bonus!)

Your Message:

Hi! Continuing DeFi agent project.
Finished Day 2 early, can we start Day 3 in the same session?

Your CURRENT_STATUS.md:

```
markdown
```

Current Status

****Phase****: Week 1, Day 2  (Completed Early!)

****Last Completed****: Git setup finished in 20 minutes instead of 30

****Next Task****: React project creation (have extra 25 minutes available)

****Issues****: None

****Ready****: Yes, momentum is strong

My Response:

Excellent pace! Since you have extra time, let's start React setup.

We can probably get the basic project structure done today.

This puts you ahead of schedule - great work!

Key Takeaways

Always Include:

1. **Where you are** (Week X, Day Y)
2. **What's done** (last completed task)
3. **What's next** (or what's blocked)
4. **Any issues** (or "None")
5. **Your readiness** (time available, energy level)

I'll Always:

1. **Meet you where you are** (no judgment on progress)
2. **Adjust the plan** if needed (flexible pacing)
3. **Provide clear next steps** (specific guidance)
4. **Keep momentum going** (celebrate progress)

Remember:

- **Partial progress is still progress** 
- **Blocks are learning opportunities** 
- **Flexibility keeps the project fun** 
- **Consistent small steps beat perfect days**
